

Note:  
eth0 = Internet  
eth1 = Internal  
thin lines = ethernet  
thick lines = PS2/KVM Connectors

Additional Notes:

- Blade Runner contains 12 blades for application cluster and hot backup/capacity spikes
- DB servers provide hot failover and hot backup
- Hot backup T1 in place as well via Megapath/Netifice
- Redundant switches in place for both internal and external switches.
